# DISCOVER THE AMERICA'S BEST PROPERTY PROFESSIONALS...

Our annual quest to find the most innovative, imaginative and effectual interior designs, developments, architectural projects and single properties is well underway. We also seek each region's most accomplished real estate agents and property consultants to determine those with the most impressive portfolios, strategic marketing and outstanding customer service. The Americas now have the opportunity to demonstrate their expertise and professionalism across all categories.

Following our extensive judging sessions, there have been several multiple-award winning companies. These include Holborn Holdings in British Columbia, Canada which has won five accolades for its project Holborn University Heights. This spectacular sustainable community of 200 homes is located in the midst of mountain ranges.

Cibrian Arquitectos has won a total of four awards for the architecture and interior design of both Casa Valencia and Casa Vista Diamante in Mexico. These single properties are the epitome of stylish 21st century living. On the hospitality and leisure front, three awards were won by Argo Development Studio in Dominica for Fort Young Hotel plus a fourth for Secret Bay Zing Zing Restaurant and Gommier Spa.

These and many other highest scoring entrants will now compete against other equally successful companies from Europe, the UK, Asia Pacific, Dubai, Arabia and Africa to determine the World's Best in each category. This year's grand final will be held on December 2nd at London's Savoy Hotel where the ultimate winners will be revealed. Visit [www.propertyawards.net](http://www.propertyawards.net) for further information.

Many congratulations to all winning companies listed in this publication.
